

Tour of Switzerland 2025 13. - 20. September 2025

Part 1, Hotel Wallberg Volketswil, the same hotel for 4 days as a homebase.

Advantage:

- all possibilities to change tours because of bad weather conditions
- with public transportation systems, tours can be shortened
- it is possible to organise shorter tours for your wives.

Planned tours:

- Zürcher Oberland with a lot of panoramic views: 100 km, 1500 m of altitude
(I did something like with Jeff last year)

- Appenzell: 150 km, 2500 m altitude, part of the tour would be with train.

Gotthard-Pass: 150 km, 2200 m altitude, Pass with many km of cobblestones. To the start we travel by train to Airolo and from there we ride back home by bicycle

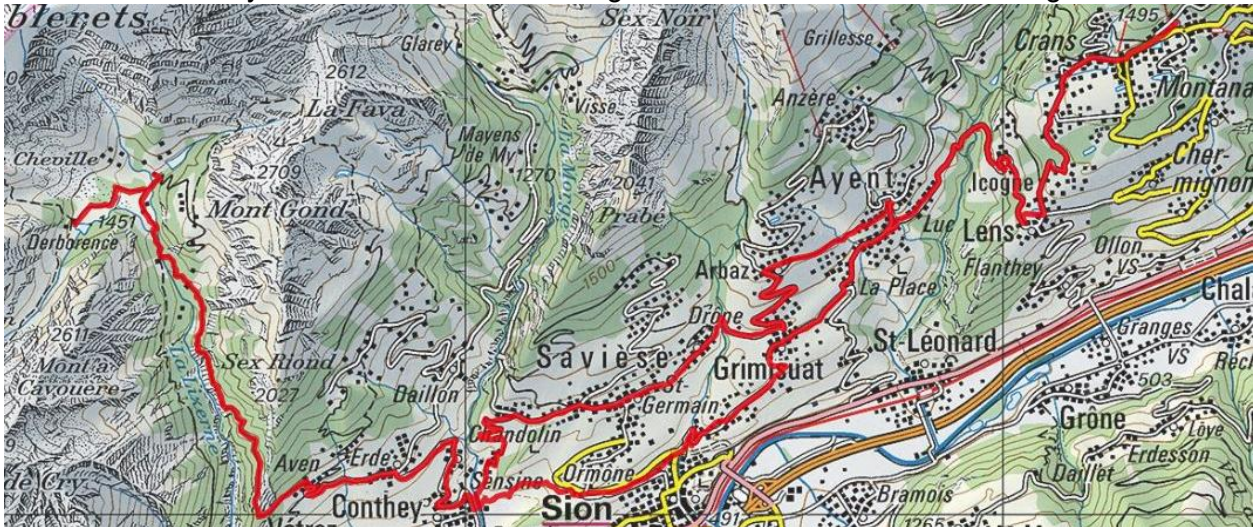

Part 2, Hotel in Crans Montana at 1500 masl, the same hotel for 3 days as a homebase.
I have been there for several times to make road bike and also mountain bike tours.
Advantage: after a long tour you can take the cable railway, which saves you 1000 m of altitude

Planned tours:

- Transfer by train to Visp and by bike to Montana: 50 km, 1600 m of height difference
I did something like with Jeff last year

- Derborance: Canyon and Lake built after a big rockslide, 100 km, 2500 m of height difference

Verbier: The Giro d'Italy passed over last year, 125 km, 3000 m
